

CURRICULUM

VIA NOVUS UNIVERSITY

MASTER'S DEGREE IN PSYCHOLOGY

GENERAL TARGETS OF THE CURRICULUM

Train human resources that develop activities of evaluation, diagnosis and design that are put into practice through intervention programs and projects aimed at the prevention of urban problems which have an impact on the improvement of the quality of life and social well-being for social and community development.

PROFILE OF THE GRADUATE

The graduate will be able to analyze from a theoretical-methodological perspective models of social intervention.

Will design and evaluate programs and social development models that consider a committed participation and respect for human rights and social actors in the social development and its application in the betterment of their community.

Will have the ability to plan, operate, monitor and evaluate programs, models of social, and community development, taking into account the protection and the improvement of priority groups and vulnerable social sectors.

Will have the knowledge necessary for the detection, diagnosis, prevention, and prognosis of community problems with the participation of those affected to identify and explain the variables and indicators in the conflicts that reach the handling of alternatives for solutions either of individual, group and social way.

In the training area will have attitudes and values like ethics of service and social responsibility, respect for cultural diversity and intervention to improve the quality of life.
